Introducción

El *Índice de la producción académica de la Universidad Politécnica de Puerto Rico en la base de datos Scopus (1994-2026)* forma parte de la serie de índices desarrollados por la Biblioteca de la Universidad Politécnica de Puerto Rico. Su propósito es facilitar el acceso y la identificación de la producción académica e investigativa de la institución.

Para alcanzar este propósito, se utilizó la base de datos *Scopus*, una de las principales fuentes internacionales de literatura científica revisada por pares. Organizado por autor, este índice reúne investigaciones, trabajos académicos y otras publicaciones en las que figura la afiliación institucional *Universidad Politécnica de Puerto Rico* o *Polytechnic University of Puerto Rico*.

Los recursos incluidos comprenden artículos de revistas, ponencias y memorias de congresos, tesis y disertaciones, informes de investigación, afiches, libros, capítulos de libros y otros documentos académicos. El índice constituye una herramienta de referencia que contribuye a la visibilidad, documentación y estudio de la producción intelectual de la comunidad universitaria.

Nota sobre los criterios de inclusión: Se incluyeron únicamente aquellas publicaciones recuperadas en *Scopus* que registran como afiliación institucional la *Universidad Politécnica de Puerto Rico* (*Universidad Politécnica de Puerto Rico* o *Polytechnic University of Puerto Rico*). La inclusión de una publicación en este índice depende de la información de afiliación registrada en *Scopus* al momento de su indización. Por consiguiente, pueden existir trabajos de autores vinculados a la institución que no se reflejen en este recurso debido a variaciones, omisiones o ausencia de la afiliación institucional en la base de datos.

Recopilación de las fuentes de información

La información bibliográfica incluida en este índice fue recopilada mediante búsquedas y análisis de los registros de autores afiliados a la Universidad Politécnica de Puerto Rico identificados en la base de datos

Scopus. Los registros recuperados fueron revisados y organizados para documentar la producción académica e investigativa de la institución durante el período comprendido entre 1994 y 2026.

Actualización del índice

La información bibliográfica contenida en este índice será actualizada periódicamente para incorporar nuevas publicaciones y realizar las correcciones necesarias. Si identifica alguna publicación o autor afiliado a la Universidad Politécnica de Puerto Rico que no figure en este recurso, puede comunicarse con el personal de Colecciones Especiales y Archivo Histórico de la Biblioteca al (787) 622-8000, extensiones 266 o 627, o escribir a referencistas@pupr.edu.

Metodología y herramientas para la indexación

La organización, normalización y gestión de las referencias bibliográficas se realizó mediante *EndNote 21*, un gestor de referencias utilizado para recopilar, organizar y mantener información bibliográfica procedente de diversas fuentes de información. Para facilitar la recuperación y ordenación uniforme de los registros, se normalizaron los nombres de autores y otros elementos bibliográficos. En algunos casos, se omitieron acentos y caracteres especiales para atender limitaciones técnicas del sistema utilizado en el proceso de indexación.

Lista de autores afiliados a la Universidad Politécnica de Puerto Rico:
